Extra Practice 1: Time Math: Hours, Minutes and Timesheets

A. Skills

1. Change to decimal hours. Round to 2 decimal places if needed.
(a) 1 h 15 min (b) 3 h 40 min (c) 10 h 48 min (d) 75 min

2. Change to hours and minutes.
(a) 2.75 h (b) 4.2 h (c) 0.45 h (d) 11.3 h

3. (a) Write 4 h 30 min as a mixed number of hours. (b) Write $\frac{7}{4}$ h as a mixed number, then in hours and minutes. (c) Write 400 min in hours and minutes, and as a mixed number of hours.

4. Add or subtract.
(a) 2 h 35 min + 4 h 50 min (b) 10 h 5 min − 6 h 30 min

5. Change to the other clock.
(a) 4:25 p.m. (b) 12:10 a.m. (c) 9:05 a.m. (d) 20:15 (e) 00:55 (f) 12:45

6. Find the elapsed time.
(a) 7:50 a.m. to 12:20 p.m. (b) 14:35 to 22:05

B. Applying

7. A painter keeps a log of her time on one house: 3 h 40 min on Monday, 5 h 55 min on Tuesday and 2 h 30 min on Wednesday. Find her total time in hours and minutes and in decimal hours (2 places).

8. A warehouse worker works from 23:30 to 08:00 the next morning, with a 30 min unpaid break. How many hours does he work?

9. A lifeguard works a split shift: 6:00 a.m. to 8:45 a.m., and 4:30 p.m. to 7:15 p.m. How many hours does she work, in decimal hours?

10. Owen works part-time at a movie theatre. Complete his timesheet.

Day	**In**	**Out**	**Time in to out**	**Unpaid break**	**Hours worked**
Monday	3:45 p.m.	9:15 p.m.		30 min	
Wednesday	4:00 p.m.	8:20 p.m.		none	
Friday	5:15 p.m.	11:50 p.m.		30 min	
Saturday	10:30 a.m.	6:00 p.m.		45 min	
				Total hours (hours and minutes)	
				Total hours (decimal hours, 2 places)	

11. Bread dough must rise for 1 h 50 min and then bake for 35 min. Zoe starts the rise at 10:45 a.m. When will the bread be done?

12. 5.2 h is the same as

A. 5 h 20 min **B.** 5 h 2 min **C.** 5 h 12 min **D.** 520 min

13. Numerical Response A movie starts at 7:35 p.m. and ends at 10:05 p.m. Its length in decimal hours is _____ h.

C. Stretch

14. A trucking company lets its drivers drive at most 11 h a day. Today Ingrid drove from 6:10 a.m. to 10:35 a.m., then from 11:20 a.m. to 3:05 p.m.

(a) How much longer can she drive today?

(b) She starts driving again at 3:50 p.m. What is the latest time she can stop?

15. A factory offers two schedules. Schedule A: 4 days a week, 7:00 a.m. to 3:30 p.m., with a 30 min unpaid break. Schedule B: 3 days a week, 6:00 a.m. to 4:45 p.m., with a 45 min unpaid break.

(a) Which schedule has more hours each week, and by how much?

(b) Give one reason a worker might choose Schedule B anyway.

16. A parking lot charges $1.25 for each quarter hour or part of a quarter hour. Sam parks from 9:50 a.m. to 1:35 p.m.

(a) How long does Sam park, as a mixed number of hours?

(b) How many quarter hours is that, and what does Sam pay?

(c) If Sam leaves at 1:40 p.m. instead, how much more does he pay? Explain.

Extra Practice 2: Wages and Salaries: Gross Pay and Pay Periods

A. Skills

1. Find the gross pay.
(a) 6 h at \$15.50/h (b) 4 h 15 min at \$20.00/h (c) 7.75 h at \$17.20/h

2. Find the hourly wage.
(a) \$378.00 for 24 hours (b) \$611.00 for 32.5 hours

3. A salary is \$49 400 a year. Find the pay per cheque for each pay period. Round to the nearest cent.

Paid	weekly	biweekly	semi-monthly	monthly
Pay per cheque				

4. Find the yearly salary.
(a) \$2075.00 paid biweekly (b) \$3625.00 paid monthly

B. Applying

5. Ethan works at a car wash in Airdrie for \$16.20/h. One weekend he works Friday 4:00 p.m. to 8:30 p.m., Saturday 9:00 a.m. to 5:30 p.m. with a 30-minute unpaid break, and Sunday 10:00 a.m. to 3:00 p.m. What is his gross pay?

6. Chloe is 17. In July she worked 26 hours at an ice cream shop and was paid \$364.00.
(a) Was she paid at least Alberta's minimum wage? Explain.

(b) What is the least she should have been paid? How much is she short?

7. An office assistant earns a salary of \$40 040 a year for 35 hours a week. What is the hourly equivalent?

8. Job A pays \$24.50/h for 36 hours a week. Job B pays a salary of \$47 840 a year for 40 hours a week.
(a) Which job pays more per week?

(b) Which job pays more per hour?

9. A worker is paid \$1800.00 semi-monthly. Her yearly salary is
A. \$21 600 **B.** \$43 200 **C.** \$46 800 **D.** \$93 600

10. Numerical Response A salary of \$42 380 a year is paid weekly. Each paycheque is \$_____.

C. Stretch

11. Paola worked from 9:45 a.m. to 3:15 p.m. with a 30-minute unpaid lunch. She earns \$16.80/h. She wrote:
"9:45 to 3:15 is $9.45 - 3.15 = 6.3$ *h, so my pay is* $6.3 \times \$16.80 = \$105.84$."
Find her two mistakes and the correct gross pay.

12. Owen earns \$18.50/h and works 30 hours a week. He gets a 4% raise. What is his new hourly wage, and how much more does he earn each week?

13. Kim's salary is \$52 000 a year, paid biweekly. She says, "I get two cheques a month, so I earn 2× my cheque each month."
(a) Find her biweekly cheque and her average pay per month.

(b) Why is her average monthly pay more than $2 \times \$2000.00$?

Extra Practice 3: Overtime: Time-and-a-Half and Double Time

A. Skills

1. Find the time-and-a-half rate and the double-time rate.
(a) \$16.00/h (b) \$19.80/h (c) \$26.50/h (d) \$14.60/h

2. Find the overtime pay.
(a) 6 h at time and a half; base wage \$15.40/h (b) 3.25 h at time and a half; base wage \$20.00/h (c) 5 h at double time; base wage \$17.85/h

3. Bianca drives a delivery van for \$21.00/h. Last week she worked 44 regular hours and 7 overtime hours at time and a half. Find her gross pay.

4. Use the Alberta 8/44 rule.

Day	**Hours**	**Hours over 8**
Monday	8.5	
Tuesday	12	
Wednesday	7	
Thursday	9.25	
Friday	8	
Total		

(a) Complete the table.
(b) Find the weekly overtime.

(c) How many overtime hours are paid?

5. Dev works 7 hours a day, every day of the week (7 days). How many overtime hours does he work under the Alberta 8/44 rule? Explain.

B. Applying

6. A daycare pays time and a half for every hour over 40 in a week. Rosa earns \$18.60/h. This week she worked 43 h 45 min. Find her gross pay.

7. Ian works in a print shop for \$17.80/h. Complete his timesheet, then use the Alberta 8/44 rule to find his gross pay.

Day	**Start**	**End**	**Unpaid break**	**Hours worked**	**Hours over 8**
Monday	8:00 a.m.	6:30 p.m.	30 min		
Tuesday	8:00 a.m.	4:30 p.m.	30 min		
Wednesday	8:00 a.m.	7:00 p.m.	1 h		
Thursday	8:00 a.m.	4:30 p.m.	30 min		
Friday	8:00 a.m.	2:00 p.m.	30 min		
			Total		

8. Talia's union agreement pays "double time and a half" (2.5 times her base wage) for work on a general holiday. She earns \$19.60/h and works 7.5 hours on Labour Day. How much does she earn that day?

9. Owen earns \$16.00/h in Alberta. He worked 10 hours a day, Monday to Friday. He worked out his pay like this: overtime $= 50 - 44 = 6$ h, so pay $= 44 \times \$16.00 + 6 \times \$24.00 = \$848.00$.

(a) What did Owen do wrong?

(b) Find his correct gross pay. How much more is it?

10. A worker earns \$22.00/h. One week she has 44 regular hours and 3 overtime hours at time and a half. Her gross pay is

A. \$1001.00 **B.** \$1034.00 **C.** \$1067.00 **D.** \$1551.00

11. Numerical Response Kofi earns \$18.90/h. He works 6.5 hours of overtime at time and a half. His overtime pay, to the nearest dollar, is \$_____.

C. Stretch

12. Lucia earns \$20.00/h. One week she worked 44 regular hours plus some overtime at time and a half. Her gross pay was \$1030.00. How many overtime hours did she work?

13. Wes earns \$18.00/h and works 44 hours a week. His boss offers him a choice: a raise of \$1.00/h, or 3 extra hours of overtime every week at time and a half (and no raise).

(a) Find his weekly gross pay for each choice.

(b) Which choice pays more each week? Which pays more for each hour he works?

14. A pipeline contract pays \$24.00/h, time and a half for hours 9 to 12 in a day, and double time for every hour after 12. Rhea works a 14-hour day. Find her pay for the day.

Extra Practice 4: Piecework and Contracts

A. Skills

1. Find each worker's pay.

(a) 1640 trees at \$0.19 per tree

(b) 48 bracelets at \$2.35 each

(c) 38 boxes of apples packed at \$1.65 per box

(d) 1200 words proofread at \$0.03 per word

2. Priya works at a dog grooming shop and is paid for each dog she grooms: \$22.00 for a small dog, \$30.00 for a medium dog and \$38.00 for a large dog. On Friday she grooms 5 small, 4 medium and 3 large dogs. How much does she earn?

3. Work backwards.

(a) A baker is paid \$147.00 to decorate 42 cupcake trays. What is she paid per tray?

(b) Dev delivers flyers for \$0.18 each. He earned \$54.00. How many flyers did he deliver?

(c) A planter earns \$0.21 per tree. How many trees must she plant to earn at least \$250.00?

4. A plumber agrees to replace a water heater for \$1850.00. The water heater and parts cost \$612.40. The job takes him 14 hours. How much does he earn, and what is his effective hourly rate?

B. Applying

5. Jun assembles bikes at a sporting goods store and is paid \$11.50 for each bike.

(a) On Saturday he assembles 11 bikes in 8 hours. What is his effective hourly rate? Is it at least the \$15.00 minimum wage?

(b) On Sunday he assembles only 9 bikes in 8 hours. How much must the store add to reach minimum wage?

6. Rashid is bidding to re-shingle a garage roof. Shingles and nails cost \$1265.00. He will pay a helper for 14 hours at \$20.00 per hour. He wants to earn \$650.00 for himself. What should he bid?

7. A bakery pays a cake decorator \$6.50 for each cake she decorates. The bakery charges customers \$18.00 for decorating a cake. In one week she decorates 35 cakes. How much does the decorator earn, and how much is left for the bakery?

8. A painter can paint a house at \$28.00 per hour, or for a contract price of \$2100.00. With the contract, she pays \$340.00 for paint.

(a) If the job takes 55 hours, which way pays more, and by how much?

(b) For about how many hours do the two ways pay the same? Round to one decimal place.

9. Leo plants 2400 trees at \$0.16 per tree. Here is his work:

$$\boxed{2400 \div 0.16 = \$15\,000.00}$$

How does an estimate show this is wrong? What is the correct pay?

10. Kai bids on a job. The materials cost \$450.00. He will pay a helper for 10 hours at \$20.00 per hour. He wants to earn \$500.00 for himself. What should he bid?

A. \$650.00 **B.** \$700.00 **C.** \$970.00 **D.** \$1150.00

11. Numerical Response A sewing worker is paid \$1.75 for each pillowcase. She earned \$122.50. The number of pillowcases she sewed is _____.

C. Stretch

12. A small landscaping company finished four contracts this summer, worth \$3850.00, \$5200.00, \$2475.00 and \$6100.00. Its materials, wages and other costs added up to \$13 400.00.

(a) What was the company's total profit?

(b) What percent of the money from the contracts was profit? Round to one decimal place.

13. A contractor bids \$8500.00 to install kitchen cabinets. His costs (cabinets, hardware and a helper) are \$5920.00. He expects to work 48 hours.

(a) What is his effective hourly rate?

(b) The customer asks for 8% off. What is his effective hourly rate at the lower price? Round to the nearest cent.

(c) He wants to earn at least \$45.00 per hour. What is the lowest price he should accept?

14. Tree planters often live in a camp and pay a camp fee for food. Mira plants for $0.17 per tree. In 6 days she plants 1900 trees each day, working 10 hours a day. Her camp fee is $25.00 per day. What does she keep after the camp fee, and what does that work out to per hour?

Extra Practice 5: Commission and Salary Plus Commission

A. Skills

1. Find the commission. Round to the nearest cent if needed.
(a) $800.00 at 10% (b) $4250.00 at 6% (c) $23 470.00 at 2.5% (d) $689.99 at 12%

2. Noor works at an electronics store and earns 5% commission. Find her total sales for the week and her commission.

Mon	Tue	Wed	Thu	Fri	**Total**
$1240.00	$865.75	$2310.40	$498.99	$1725.86	

3. Owen earns $375.00 a week plus 6% of his sales. This week he sold $5280.00. Find his gross pay.

4. A company pays 5% on the first $8000 of sales and 8% on sales over $8000. Find the commission on sales of $11 750.

5. Find the commission rate as a percent.
(a) $252.00 on sales of $6300.00 (b) $1035.00 on sales of $46 000.00

B. Applying

6. Sofia works at a furniture store in Red Deer. She earns $15.00/h plus 3% commission. One week she works 25 h and sells $9860.00. Find her gross pay.

7. A truck dealership pays Grant $2000.00 a month plus 1.5% of his sales over a monthly quota of $80 000. In June he sold 4 trucks for a total of $186 400. Find his gross pay for June.

8. A farm auction company near Brooks earns 12% commission on everything it sells. At one auction it earned $5862.00. What was the total value of the items sold? Check your answer.

9. Mei is offered two jobs selling kitchen cabinets.
Job P: 8% straight commission. **Job Q:** $1600 a month plus 3% commission.

(a) Complete the table.

Monthly sales	$20 000	$32 000	$40 000
Job P pay			
Job Q pay			

(b) For what sales does Job P pay more?

(c) Mei is new to sales. Which job would you suggest? Why?

10. A company pays 3% on the first $20 000 of sales and 4% on sales over $20 000. The commission on $30 000 of sales is
A. $900 **B.** $1000 **C.** $1200 **D.** $2100

11. Numerical Response Arjun earns $480 a week plus 4.5% of his sales. In a week when he sells $6800, his gross pay, to the nearest dollar, is $_____.

C. Stretch

12. Some car lots pay commission on the **profit** from a car (selling price − what the lot paid), not on the selling price. A used-car lot pays its salespeople 25% of the profit. The lot paid $9400 for a car, and Nadia sells it for $13 900. What is her commission?

13. A boat dealer pays 2% on the first $20 000 of monthly sales, 3% on the next $20 000 (from $20 000 to $40 000), and 5% on sales over $40 000. Find the commission on monthly sales of $52 300.

14. Lena earns \$2200 a month plus 4% commission. Her sales are usually about \$28 000 a month. Her boss offers her a choice: a raise in base pay to \$2500, *or* a raise in commission rate to 5%.

(a) Which choice pays more at \$28 000 of sales? By how much?

(b) What if her sales grow? Find the sales where the two choices pay the same, and say which is better above that.

Extra Practice 6: Extra Earnings: Tips, Bonuses and Shift Premiums

A. Skills

1. Find each tip.
(a) 15% of a $56.00 bill (b) 18% of a $92.50 bill (c) 20% of a $37.85 bill

2. What percent tip is it? Round to the nearest tenth of a percent if needed.
(a) $12.00 on a $75.00 bill (b) $4.50 on a $31.20 bill

3. Seven servers share a tip pool of $598.50 equally. How much does each server get?

4. (a) A dental assistant earns $38 750 a year and gets a 6% bonus. Find the bonus.

(b) A gym pays its staff $12 for each membership they sell. Jas sold 23 memberships. Find her bonus.

5. (a) A worker gets a shift premium of $2.40/h. She worked 18 premium hours. How much premium pay did she earn?

(b) A nurse's base wage is $17.60/h. A weekend shift pays 15% more per hour. What is the weekend rate?

B. Applying

6. Owen delivers groceries in Calgary. He is paid $15.00/h. On Sunday he worked 5 hours and made 14 deliveries. His tips averaged $4.25 per delivery.
(a) Find his gross pay for Sunday.

(b) How much did he earn per hour, with tips?

7. A brunch restaurant collects $1150.00 in tips on Sunday. First, 10% goes to the dishwashers. The rest is shared by the three servers by the hours they worked: Lina 9 h, Rob 7.5 h and Kim 6.5 h. How much does each server get?

8. A security guard earns $17.25/h. He gets a night premium of $2.00/h for hours between 11:00 p.m. and 7:00 a.m. He works 7:00 p.m. to 3:00 a.m., four nights a week (paid breaks). Find his gross pay for the week.

9. A hotel front-desk clerk can choose a holiday bonus of $350, or 1.5% of her pay for the year. She earned $24 960 this year. Which bonus is better, and by how much?

10. A barber's tips last week were $207.00. His tips are 18% of what he charges, on average. How much did he charge his customers in total?

11. A drilling rig worker earns $38.00/h, plus isolation pay of 20% more per hour. His hourly rate with isolation pay is

A. $7.60 **B.** $38.20 **C.** $45.60 **D.** $58.00

12. Numerical Response A server earns $15.00/h for a 6-hour shift. Her tips are 15% of her $860.00 in bills. Her gross pay for the shift, to the nearest dollar, is $_____.

C. Stretch

13. Kendra drives a city bus in Calgary. She earns $28.40/h. This week she worked 46 hours, never more than 8 hours in a day. She gets a split-shift premium of $1.80/h, and 15 of her hours were split-shift hours. Find her gross pay.

14. Jordan is a server. He earns $15.00/h and works 30 hours a week. He wants his gross pay to be $900 this week. His tips are 15% of his bills. What must his bills total?

15. Simone sells farm equipment in rural Alberta and drives her own truck. She is paid \$0.55 for each kilometre she drives, plus 6% commission on her sales. Last month she drove 1840 km and sold \$32 500 of equipment.

(a) Find her pay for the month.

(b) Why is the money per kilometre not all extra money for Simone?

16. Job A at a diner pays \$16.00/h, and the tips average \$9.50 per hour. Job B at an office pays \$22.50/h with no tips. Both jobs are 30 hours a week.

(a) Which job pays more in a typical week, and by how much?

(b) Give one reason someone might still choose Job B.

Extra Practice 7: Deductions and Net Pay: Reading a Pay Stub

A. Skills

1. Find the total deductions and the net pay.

(a) gross pay \$530.00; CPP \$31.54, EI \$8.69, income tax \$42.40

(b) gross pay \$1688.40; CPP \$100.46, EI \$27.69, income tax \$270.14, health plan \$28.75, charity \$12.00

2. Complete the table. The rates are CPP 5.95%, EI 1.64%, and the income tax rate shown. Round each deduction to the nearest cent.

	Gross pay	**Tax rate**	**CPP**	**EI**	**Income tax**	**Total**	**Net pay**
(a)	\$415.00	9%					
(b)	\$1362.50	17%					

3. Find each percent.

(a) A pension deduction of \$22.08 on gross pay of \$690.00. What is the pension rate?

(b) Net pay of \$1306.80 on gross pay of \$1650.00. What percent is take-home?

(c) Union dues of \$28.60 on gross pay of \$1144.00. What is the union dues rate?

4. Find the taxable income.

	Gross pay	**Before-tax deductions**	**Taxable income**
(a)	\$1780.00	union dues \$44.50, RRSP \$60.00	
(b)	\$2615.40	pension plan 3% of gross pay, union dues \$35.00	
(c)	\$920.00	none	

B. Applying

5. Ella is a server in Calgary. Her gross pay this week, including the tips paid out on her cheque, is $742.80. Her deductions are CPP 5.95%, EI 1.64%, income tax 11%, and $12.00 for staff meals. Find her net pay.

6. Ravi has two part-time jobs. This week he earns $410.00 gross at a bike shop (income tax 10%) and $286.00 gross tutoring at a learning centre (income tax 8%). Both jobs take off CPP 5.95% and EI 1.64%.

(a) Find his net pay from each job and his total net pay.

(b) Which job lets him keep a bigger percent of his gross pay? Show how you know.

7. Use Grace's pay stub. She is paid the same amount every week.

Westwinds Auto Body, Calgary, AB
Employee: Grace Lindqvist Pay period: Oct. 19–25, 2026

	Hours	**Rate**	**This pay**	**Year to date**
Regular earnings	37.5	$24.80	$930.00	$32 550.00
CPP		5.95%	$55.34	$1936.90
EI		1.64%	$15.25	$533.75
Income tax			$158.10	$5533.50
Health plan			$19.40	$679.00
Total deductions				
Net pay				

(a) Check her gross pay for this week.

(b) Find her total deductions and net pay for this week. Write them on the stub.

(c) What income tax rate is she paying?

(d) How many weeks has she been paid so far this year?

(e) Find her year-to-date total deductions and net pay. Write them on the stub.

8. Marc is a journeyman electrician in Fort McMurray. His gross pay this week is $2350.00. His before-tax deductions are union dues of $42.50 and a pension plan of 5% of gross pay. His other deductions are CPP 5.95%, EI 1.64%, and income tax 22% of his taxable income.

(a) Find his taxable income.

(b) Find his net pay.

(c) How much income tax do his before-tax deductions save him this week?

9. Nadia's gross pay is $1500.00 and her net pay is $1155.00. Her deductions are what percent of her gross pay?

A. 23% **B.** 29.9% **C.** 77% **D.** 345%

10. Numerical Response Lena's pay stub shows CPP of $47.60 on gross pay of $800.00. Her CPP rate, as a percent to the nearest hundredth, is _____%.

C. Stretch

11. What if? Jordan works 25 hours a week at a grocery store for $16.80 an hour. His deductions are CPP 5.95%, EI 1.64% and income tax 10%. His manager asks him to add an 8-hour shift every Saturday, at the same rate.

(a) Find his weekly net pay for 25 hours and for 33 hours.

(b) The extra shift adds how much gross pay? How much of it does Jordan take home, in dollars and as a percent?

12. Paul's gross pay is $1520.00. His union dues are 2% of gross pay (before tax). His other deductions are CPP 5.95%, EI 1.64% and income tax 15% of taxable income. He says his net pay is $1181.19. Find his mistake and his correct net pay.

13. Two jobs at a Calgary print shop each work 37.5 hours a week. Job A pays \$19.00 an hour, with no union and no health plan. Job B pays \$20.50 an hour, with union dues of 2.5% of gross pay (before tax) and a health plan of \$22.00. For both: CPP 5.95%, EI 1.64%, income tax 15% of taxable income.

(a) Find the weekly net pay for each job.

(b) Job B pays \$1.50 more an hour. How much more does it pay in net pay each week? Give one reason someone might still choose Job B.

Extra Practice 8: Working Backwards: How Many Hours Do I Need?

A. Skills

1. Find the missing value. Write the formula you use.

(a) $15.25 an hour for 24 hours; find the pay

(b) pay $528.00 at $16.50 an hour; find the hours

(c) pay $637.50 for 34 hours; find the rate

(d) pay $1150.00 at $23.00 an hour; find the hours

2. Sam earned $612.00 for 36 hours of work at a hardware store. What is his hourly wage? Is it at least the Alberta minimum wage of $15.00 an hour (as of 2026)?

3. Gabe earns $15.00 an hour. How many whole hours must he work to earn at least $260.00?

4. How much must each person sell?

(a) 5% commission; wants $750.00 in commission

(b) 2.5% commission; wants $400.00 in commission

5. Rosa earns $20.00 an hour. Her deductions take 25% of her gross pay.

(a) What is her net pay for one hour?

(b) How many hours must she work to take home $450.00?

B. Applying

6. Mia is a server at a restaurant in Canmore. She earns $15.00 an hour, and her tips average $9.50 an hour. About how many hours must she work to earn $1225.00 in wages and tips?

7. A drywall contractor agrees to finish a basement for $2400.00. He pays $650.00 for materials out of that price. He wants to earn at least $35.00 an hour for his time. What is the most hours he can spend on the job?

8. Lucas works 8 hours a day, Monday to Friday, as a welder's helper for $24.00 an hour. Extra hours added to a shift are overtime at time-and-a-half. How many overtime hours does he need to earn $1176.00 this week?

9. A courier is paid $1.85 for each package she delivers. How many packages must she deliver to earn at least $250.00 in a day?

10. Owen earns $15.00 an hour. His deductions are CPP 5.95%, EI 1.64% and income tax 10%. He wants a game controller that costs $349.99 in Lethbridge.

(a) What is the controller's price with 5% GST?

(b) Find Owen's net pay for one hour.

(c) How many whole hours must he work to buy it?

11. Kim earns a salary of $1200.00 a month plus 5% commission on her sales. To earn $2000.00 this month, her sales must be

A. $40 000 **B.** $16 000 **C.** $24 000 **D.** $4000

12. Numerical Response Nadia earns $16.80 an hour. Her deductions take 20% of her gross pay. The number of hours she must work to take home $504.00, to the nearest tenth, is _____.

C. Stretch

13. A furniture salesperson earns 4% commission on the first $15 000 of her sales in a month and 7% on sales over $15 000. How much must she sell to earn $2000.00 in commission?

14. Cole earns $19.00 an hour. On each pay cheque, 20% of his gross pay is taken for CPP, EI and income tax, and then $15.00 is taken for union dues. He wants a net pay of at least $1000.00 on his next cheque.

(a) What gross pay does he need? (Hint: the net pay plus the union dues is 80% of the gross pay.)

(b) How many whole hours must he work in the pay period? Check your answer.

15. Liv needs to take home $2400.00 over 8 weeks this summer for a tuition deposit. She earns $17.25 an hour, and her deductions take 21% of her gross pay. How many whole hours a week must she work? Explain why 22 hours a week is not quite enough.

Extra Practice 9: Unit 2 Review

Practice Test 2. Treat this like the unit test. Show your work and round money to the nearest cent. Deduction rates are examples.

A. Skills

1. Change each time.
(a) 50 min to decimal hours (b) 4.75 h to hours and minutes (c) 18:45 to 12-hour time (d) Add: 8 h 35 min + 6 h 40 min

2. Find each gross pay.
(a) 28 h at \$15.85/h (b) 7.5 h at \$19.40/h (c) 32 h 15 min at \$16.00/h

3. A lab technician earns a salary of \$58 500 a year. Find her pay for each pay period.
(a) weekly (b) biweekly (c) semi-monthly (d) monthly

4. A cook earns \$20.80/h.
(a) What is her time-and-a-half rate?
(b) What is her double-time rate?

5. Find each commission.
(a) 3.5% of \$8640 in sales
(b) 12% of \$1275 in sales

B. Applying

6. Rajveer works at a tire shop in Red Deer for \$20.40/h. His hours this week are Mon 8, Tue 9.5, Wed 8, Thu 8, Fri 8, Sat 6. Overtime is time and a half under the Alberta rules.
(a) How many overtime hours does he get? Show both ways of counting.

(b) What is his gross pay?

7. Lucy delivers flyers for \$0.09 a flyer. On Saturday she delivers 1450 flyers in 8 h. A job at a bakery pays \$15.00/h. Which pays more per hour?

8. Mateus bids \$2650 to build raised garden beds. Lumber and soil cost him \$980. He does all the work himself in 22 h.

(a) What is his effective hourly rate?

(b) For his next job (same materials, same hours), Mateus wants to earn exactly \$60.00 an hour. What should he bid?

9. A hairstylist earns \$16.00/h and works 30 h this week. Her clients leave tips that average 18% of the \$1240 she charged for services. She also gets \$2.00 for each bottle of shampoo she sells, and she sells 14. What is her gross income for the week?

10. Kofi earns a salary of \$43 680 a year, paid biweekly. Complete his pay stub. Use CPP 5.95%, EI 1.64% and income tax 17% of taxable income. His RRSP deduction is a before-tax deduction.

Gross pay	
RRSP (before tax)	\$50.00
Taxable income	
CPP (5.95%)	
EI (1.64%)	
Income tax (17%)	
Charitable donation	\$10.00
Total deductions	
Net pay	

11. A worker earns \$16.00/h. One week she works 40 regular hours and 6 overtime hours at time and a half. Her gross pay is

A. \$736.00 **B.** \$784.00 **C.** \$832.00 **D.** \$1104.00

12. Which job is most often paid by piecework?

A. a bank teller **B.** a real estate agent **C.** a tree planter **D.** a nurse

13. Kim earns a straight 6% commission. To earn \$1500 in a month, she must sell

A. \$25 000 **B.** \$90.00 **C.** \$9000 **D.** \$2500

14. Numerical Response A salary of \$38 480 a year for 40 h a week has an hourly equivalent, in dollars, of _____.

15. Numerical Response Four servers share \$560 in pooled tips by hours worked. They worked 40 h in all, and Jo worked 15 h. Jo's share, in dollars, is _____.

C. Stretch

16. Two stores offer Elena a sales job. **Store A**: a straight 4% commission. **Store B**: \$1500 a month plus 2% commission.

(a) What would she earn at each store with sales of \$60 000 in a month?

(b) At what sales do the two stores pay the same? (Hint: Store A pays 2% more on every dollar of sales. How many sales does that 2% need to make up \$1500?)

(c) Elena usually sells about \$50 000 a month. Which job should she choose? Give one reason that is not only about the money.

17. Mia wants a used e-bike that costs \$1450. She earns \$17.20/h, and about 22% of her gross pay is taken off for deductions.

(a) What is her take-home pay for each hour?

(b) How many hours must she work to pay for the e-bike?

(c) She works 20 h a week. How many weeks will it take?

18. Sam works in Alberta for \$18.00/h. One week he works 10 h a day from Monday to Thursday. His boss paid him $40 \times 18 = \$720.00$, saying "40 hours is not over 44, so there is no overtime."

(a) Explain the mistake.

(b) What should Sam have been paid, and how much is he owed?
